U-Lock D1200 L →

Ultimate Security.

Designed for total peace of mind in urban environments, this U-lock resists all cutting tools for several minutes, including electric angle grinders. By requiring multiple disc changes for a single cut attempt, it makes theft extremely long, complex, and deterrent, providing the best possible protection for your bike.

Approved by the best labels

Achieving the maximum security rating of 10/10, the D1200 U-lock features a **0.5 mm silicon carbide** layer as well as a **16 mm case-hardened steel shackle**. It is certified and approved by the highest European standards: ART4, Sold Secure Diamond, and SRA (motorcycle standard).

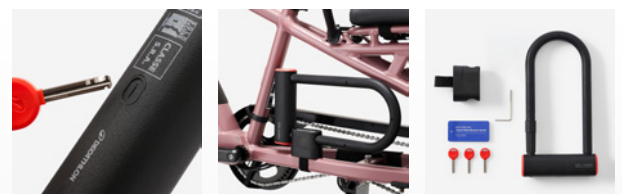

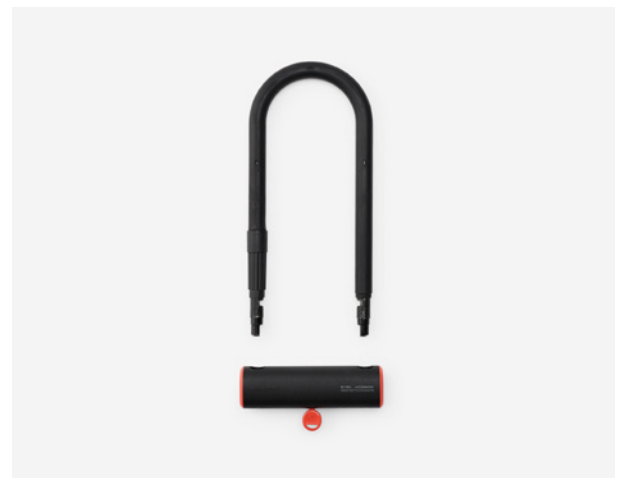

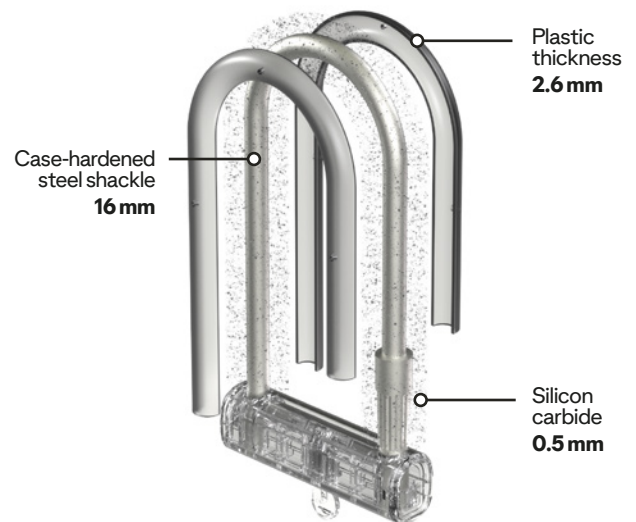

Practical for everyday use

Its **27.3 cm usable** length allows you to secure up to 2 bikes to street furniture, making it perfectly suited for larger bikes such as cargo bikes. It comes with a **universal strap mount for easy frame transport** on any tube diameter between 60 and 180 mm, while its soft rubberized sleeve protects your frame's paint from scratches. Its high-security stainless steel cylinder features a **rain and dust protective cover**.

Guaranteed key service

For long-term peace of mind, the D1200 lock comes with **3 numbered keys** and a product identity card. In case of loss, our key re-ordering and replacement service is available and valid anywhere across Europe, Switzerland, and the United Kingdom (UK).

→ Did you know?

Because a lock leaves no room for chance, we delved deep into the materials and design process to engineer unprecedented protection. Subjected to extreme testing protocols reproducing real-world theft techniques — up to direct angle grinder attacks —, our D1200 lock pushes the boundaries of resistance.
